DN-700H Network Audio Player

The Denon Professional DN700H is the first in a new line of Denon Professional Commercial Installation products. Designed to be fully functional as a Network Media player the DN700H also represents a new visual appearance from Denon Professional combining a single style across a new product range to add some elegance to the functionality.

The DN700H is a 1U rack-mount device. Designed to offer playback from a number of local and network sources, it forms a key part of any basic or advanced installation. With a bright OLED display and LED button navigation the unit is easy to use from the front panel even in dark or low-light conditions. The audio monitor on the front panel ensures the quality and selection of the audio source when required, and the professional XLR outputs will guarantee good signal connection to the mixer or router. Full remote control is available via Telnet and the included IR controller.

The DN700H is able to playback audio from the following sources :

- Internet Radio
- Network server
- USB Media Player
- USB Storage Device
- FM Radio (internal tuner)
